

Text:

They say this gets you on the way  
But let me tell you dudes  
Unless your invention  
adds more convention  
You're going nowhere

don't care  
where  
you put it...

They say you won't get it right  
That Edison took 1000 tries  
to get the bulb to light  
But I've taken more

That final Eureka moment hit  
and my brain bursts into 5 million bits  
I take apart my complex invention  
and make it finally perform its intention

color notes:

preson in thought bubble: normal color

Presfon not in thought bubble  
Should have a yellowish hue

Sky in thought bubble is blue

Yellowish hue to everything outside  
of the thought bubble (exception of  
text)

thought bubble

has normal colors

No shading

on anything...

white grey ground

such... I hope

Presfon should

be a cream.

Just wondering  
what we are next

Random notes:  
It's a Rocket pack  
Not a Jet Pack
